

AFAC NRSC

National Resource Sharing Centre

AFAC NRSC coordinates and facilitates international and interstate deployments through its established partnerships and national arrangements, authorised by the Commissioners and Chief Officers Strategic Committee (CCOSC). AFAC NRSC is recognised by CCOSC as an enabler of national capability for fire and emergency services.

Goal 1

Interstate and international assistance

Contribute and support the coordination of interstate and international assistance and resources as authorised by CCOSC.

Goal 2

AFAC NRSC systems and resources

Continue to develop AFAC NRSC systems, and nationally consistent tools and resources that support both intrastate, interstate and international deployments.

Our systems, networks and relationships

AFAC NRSC is continuing to develop systems such as our National Deployment Registry, and nationally consistent tools and resources that support both intrastate, interstate and international deployments.

Interstate

AFAC NRSC supports CCOSC by facilitating and coordinating interstate resource sharing across Australia and New Zealand. In response to significant events and resource requests, the AFAC NRSC deploys national representatives to act in a coordination role, to maintain situational awareness, and assist jurisdictions with their resource requirements.

International

AFAC NRSC is responsible for coordinating deployments of Australasian wildfire management resources to/from North America. We maintain our partnerships with the Canadian Interagency Forest Fire Centre (CIFFC) and the National Interagency Fire Fighting Center (NIFC) in USA. The AFAC NRSC deploys critical roles including national liaisons, deployment management, field liaisons and duty officers to ensure the health and safety of teams deployed. The AFAC NRSC builds internationally deployable teams with the support from the AFAC NRSC Operational Hubs based in Victoria, New South Wales and New Zealand, and with the effective collaboration and engagement from our members.

Goal 3

AFAC NRSC business

Continue to develop and enhance AFAC NRSC business.

Goal 4

Business continuity and resourcing

Ensure the business continuity, flexibility and adaptability of AFAC NRSC.

Our principles

Recognising national capability

National coordination maximising available capacity

Efficiency through effective partnership and collaboration

Timely deployment of fit-for-purpose resources

Flexible and adaptable, meeting agency requirements
